Communication interface	RS485 (half-duplex mode)
Switching outputs	3x push-pull (PNP/NPN)
Analog outputs	Current loop (4 - 20 mA, single-ended, 12 Bit resolution)

Beam pattern

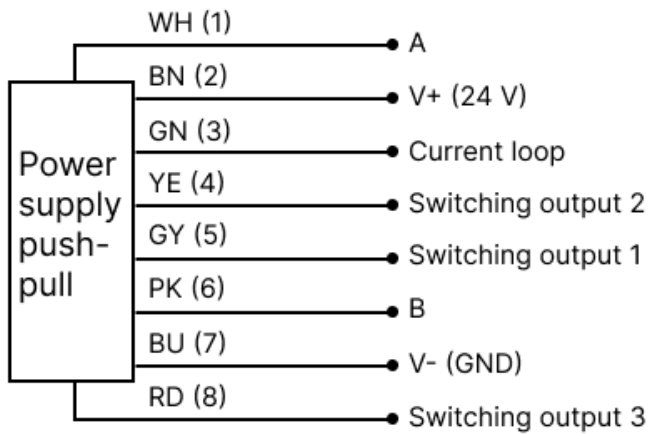

Typical beam pattern for a 0.35 m corner reflector.

Note: The effective beam pattern depends on the sensitivity level, the target properties and the sensors measurement range.

Connection

V+ (24 V) and V- (GND) are used for the power supply. The pins A and B are used for RS485 data exchange. These 4 pins are needed for operating the sensor with RS485 communication. The sensor can be connected with an 8-pin a-coded M12 cable. Additional pins are the 3 switching outputs and the current loop.
